Application/Control Number: 10/080,975 Page 2

Art Unit: 1651

## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 and 10-23 and 32-33, drawn to a composition, classified in class 424, subclass 484.
  - II. Claims 24-31, drawn to a method of improving absorption of a high molecular weight, lipophilic, bioactive agent in the gastrointestinal tract, the method comprising orally administering to a subject the composition of claim 1, classified in class 514, subclass 1.

Claims 8 and 9, drawn to the method of claim 1, are not properly dependent upon claim 1; thus, the claims can not be classified.

- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product. For instance, in U.S. Patent 6,184,255, Mae et al. teach a method of improving the bioavailability of CoQ10 by administering a combination of the oxidized and reduced forms of this bioactive agent.

Application/Control Number: 10/080,975

Art Unit: 1651

4. Because these inventions are distinct for the reasons given above and the search required

for one Group is not required for another Group, restriction for examination purposes as indicated

Page 3

is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Michele Flood whose telephone number is (703) 308-9432. The examiner

can normally be reached on Monday through Friday from 7:15 am to 3:45 pm. Any inquiry of a

general nature or relating to the status of this application should be directed to the Group 1600

receptionist whose telephone number is (703) 308-0196 or the Supervisory Patent Examiner,

Brenda Brumback whose telephone number is (703) 306-3220.
